Subject: glycol analysis

Attached are two documents regarding the glycol analysis performed by Region 3. One is a paragraph summarizing the method. The other is a more comprehensive procedure that is included in the case narrative when the analysis is performed. We have been requested by ORD to provide this information to them so that they may provide it to Chesapeake Oil and Gas at their meeting on Tuesday. We plan to release the same information to Cabot tomorrow. Please note that the case file notes have already been posted on Region 8's website re: Pavilion investigation.
